

CUSTOM POWER SYSTEMS

SEI recognizes certain user requirements may not be met with our standardized DC-UPS's. Our **Custom Products Group** engineers and develops power solutions, directed toward specific applications, user specified options, or to specific form-fit requirements.

Custom Packaged DC UPS

Based on volume, these custom solutions can be priced to compete with off-the-shelf products and produced within a 60 -120 day turnaround time. As examples, these custom units can provide solutions that include:

- **Ruggedized Units/NEMA Enclosures**
- **Application Specific Packaging**
- **Extended Temperature Ranges**
- **Regulated Power in the 5-12-24-48 Volt Range**
- **User-Specified Communication Interfaces**
- **Alternative Inputs such as Solar**
- **Military Applications**

Custom DC UPS in a NEMA

With the capability to design and package ancillary system components in custom enclosures, we can also rack and test the UPS and subsystems on the engineering floor prior to shipment.

Military Mobile DC-UPS

We can take a concept from design to prototype, and finish with full production. For further information please call to find out more about SEI's Custom Product Engineering Services.
