

**The Juice Box XP – eXtra Power  
for power-hungry applications such as 802.11n  
Wireless APs, or PTZ IP Security Cameras.**

With over ten years of field installations and experience to back it up, the award-winning **JUICE BOX MX** has been promoted! Boasting up to 22 watts per port simultaneously, in the same field-proven platform, the **JUICE BOX XP** is your choice for delivering on the promise of high-power PoE. Switches cannot deliver extra power . Other midspans can't deliver extra power to **ALL** their ports simultaneously. Only SEI's **JUICE BOX XP** delivers the extra power to all ports at the same time, in a user-friendly and *affordable* solution.

**Not PoE enabled?**  
Even if your devices are not capable of receiving PoE, we can deliver power to your devices. Our line of high-power PoE splitters will enable your non-PoE devices to operate with the benefits of Power Over Ethernet:

- \*No extra wiring
- \*Fast, easy installation
- \*Central Power Monitoring
- \*Central Power Management
- \*Central Power Backup

With 30 years of power systems experience, only SEI can provide the "Made in the USA" products and solutions you need for today's data *and* power-intensive environments. SEI is the leader in premise power solutions, with over one million ports powered by our products.
